

Sustaining The Expeditionary Maneuver Warfare Sea Base

29 October - 1 November 2001
NDIA
6th Annual Expeditionary Warfare
Conference

Sustaining EMW Sea Base

■ Theme:

- Resupplying ships of the future naval expeditionary sea base when US bases and friendly ports not available

■ Focus:

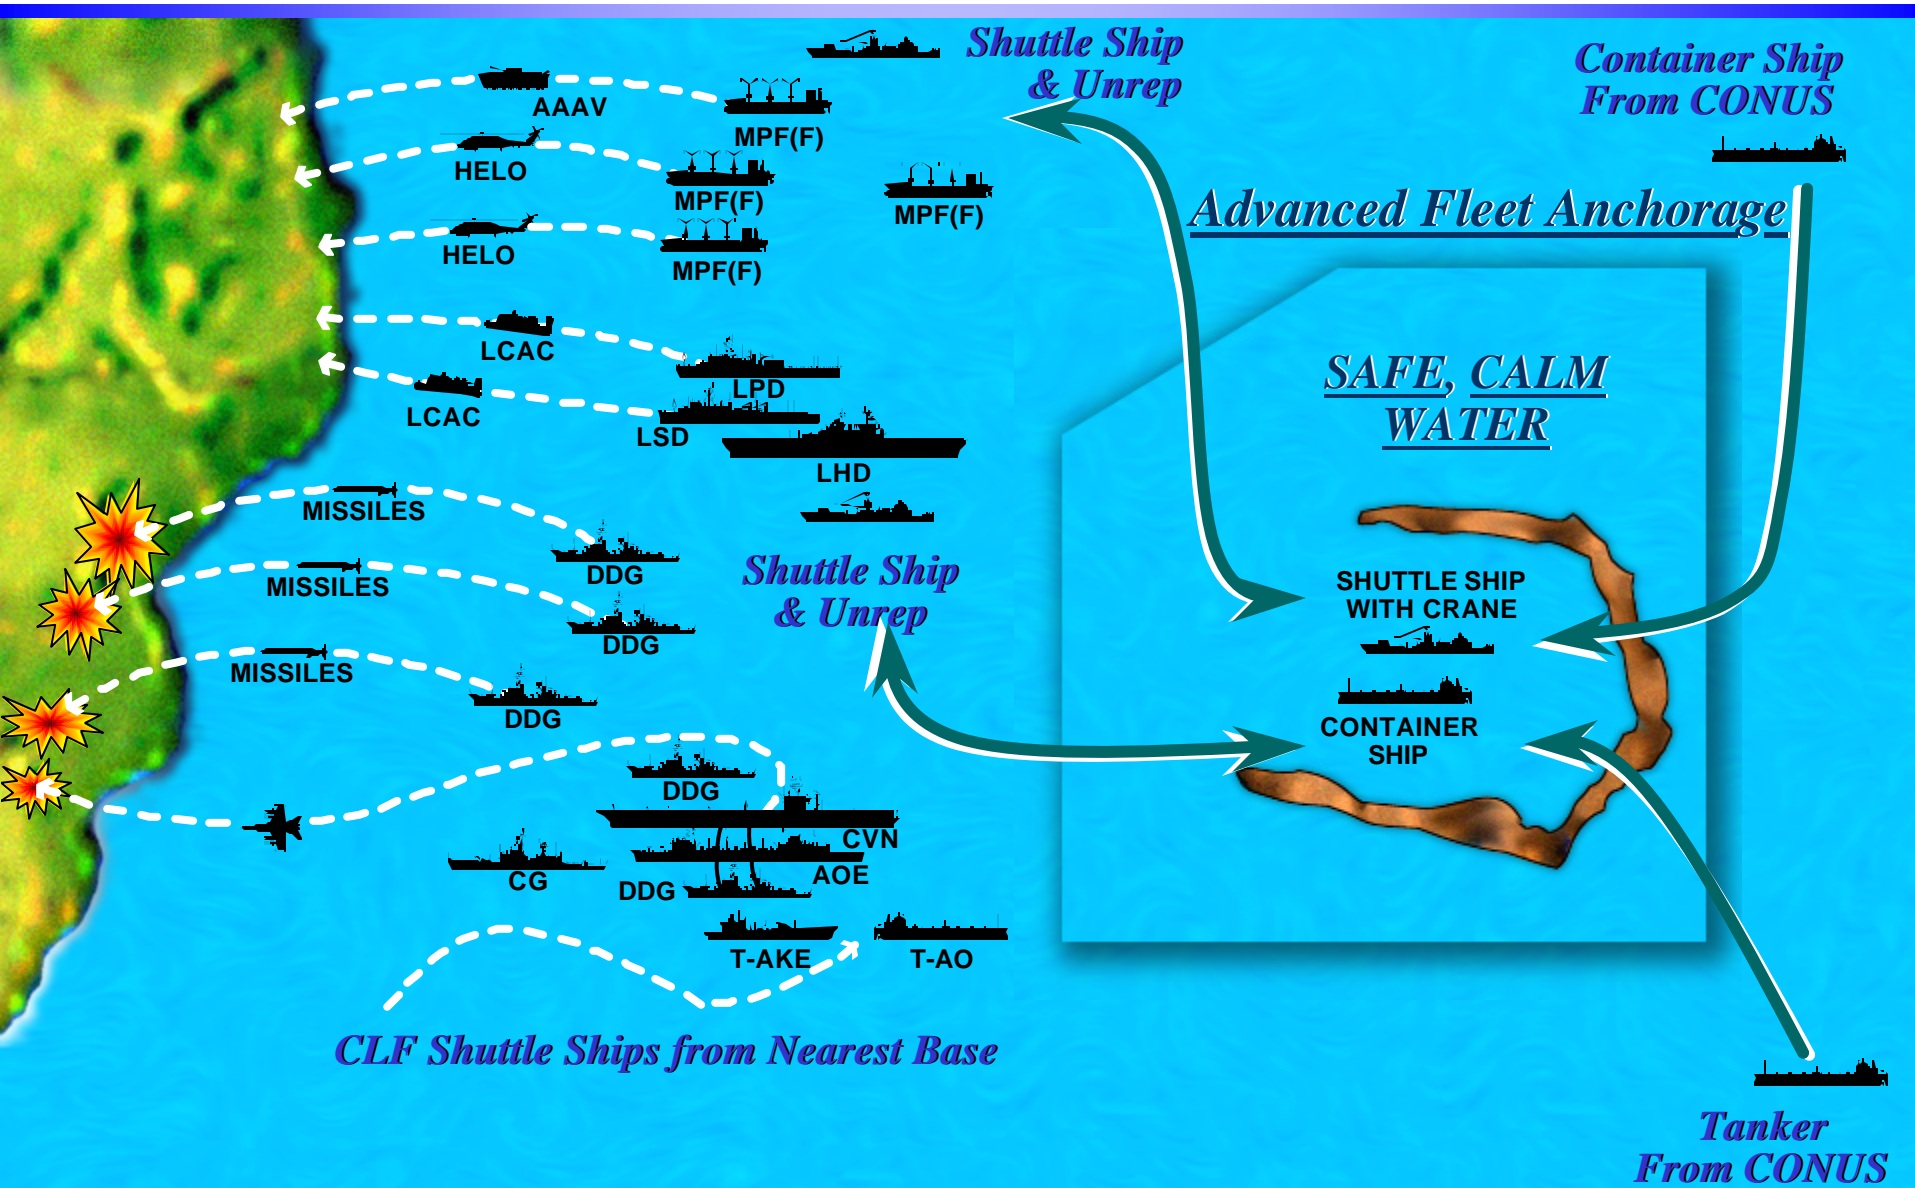

- Future sea base must provide indefinite sustainment to Marine Air Ground Task Forces (MAGTF) while projecting naval combat power

■ The Tech Challenge :

- Create an affordable and effective system to resupply the sea base in up through sea state 5 conditions without requiring construction of another large fleet of combat logistics force (CLF) ships

- **Meeting the Challenge by Developing Two New Logistics Capabilities**
 - **Quickly establish a throughput facility in the nearest safe, calm water to the expeditionary operations**
 - **Adapt future Maritime Prepositioning Force (MPF) ships so they can also operate as expeditionary shuttle ships**
